Robert Anstey

Developer / Analyst

✉ robert.anstey@gmail.com ⌂ robanstey.netlify.app ⌾ github.com/spenctious ☎ 07964 698537 ⊚ Rugby, UK – able to relocate

---

10 years relevant industry experience for big name clients

▷ 5 years as a developer, 5 years in Technical & Business Analysis
▷ Nationwide, IBM, Orange, Highways Agency, Thales, British Telecom

Looking to return to development, seeking Junior Developer role

▷ New qualifications in front-end web skills, now learning back-end
▷ Completion of responsive data-driven web app, portfolio site, more in development

---

Experience

Recent, various
Sept 2016 – Present

▷ **A small business project** reinventing the walking guidebook for the modern smartphone era: field research, book on Amazon, Wix website, downloadable routes, 1:50,000 map.
▷ **Caregiver** for my mother who passed away in 2020.
▷ **Training** in Web development, Business Analysis and Agile (leading to certification).

Technical Analyst for IPL / IBM / Nationwide
July 2015 - Aug 2016

▷ Contract role (3 extensions), Next Generation Banking App, core payments functionality.
▷ Key member of the Functional Analysis and Design team working closely with UX to turn idealised happy-path UX designs into fully fleshed-out implementable specs.
▷ Nationwide PRIDE award winner, became de-facto Payments SME, initiated and built a new component-based customer journey model for 26 payment scenarios in Axure over a weekend.

Career break – Travel, publishing
Oct 2012 - Jul 2015

Senior Requirements Analyst, Senior Analyst, Lead Developer at IPL
Oct 2007 - Oct 2012

▷ Nationwide (5 projects), IBM, Thales (2 projects), Fertility Focus, IPL (Cantata++).
▷ Senior Requirements Analyst for Nationwide for an appointment booking system refresh. Elicited and documented hundreds of high-level and detailed requirements, SLAs and KPIs; prototyped designs, introduced Agile-like practices (sole analyst).
▷ Analyst and Senior Analyst roles for Nationwide working mainly on their Online Bank and the new replacement MVC-based Internet Bank.
▷ Developer and Lead Developer roles using C# in medical diagnostics, cryptographic key management, testing and web development, where I led a small team fixing a broken advertising system while integrating a new CMS.

Career break – Travel, teaching
April 2005 - August 2007

Senior Programmer, Analyst/Programmer at IPL
Sep 2000 - Feb 2005

▷ Highways Agency, Orange, IPL (Cantata++), British Telecom, Teachers Provident Society
▷ Mostly C++ on Windows with some Java and VBA.
▷ Introduced exception-safe thread locking techniques and programmed core communication modules with DCOM for a motorway traffic management system.
▷ Initiated automatic coding standards checker project for Cantata++, IPL's C++ test tool.
▷ Proposed and implemented database refactoring for more efficient queries for a heavily data-dependent customer services system.
